Church facility management software scorecard

Give each line a weight for how much it matters to your church (1 = nice to have, 2 = important, 3 = must have). After each product's trial, score it 0 (no), 1 (partly) or 2 (yes). The totals multiply each score by its weight.

Church _____

What to check	Weight 1 to 3	Product 1	Product 2	Product 3	Notes
Everyday work					
Anyone can report a problem from a phone, without an account or an app Ideally by scanning a code in the room					
Each job can go to a person, a team or an outside vendor, and they're notified					
You can see what's open, in progress, done and overdue					
Preventive maintenance turns into work orders on its dates With a record of who did each job and when					
Staff and volunteers each see their own list for the day Including jobs that repeat on chosen days of the week					
Building and calendar					
The calendar catches double bookings With setup and teardown time built into each one					
Each system's age, service history and replacement cost Enough to build a replacement plan for the budget					
Paperwork					
Inspection and certificate dates, with reminders before they're due					
Documents (manuals, warranties, contracts) where staff can find them					
Vendors' details and insurance expiration dates in one list					
What each repair costs, and what each building costs over a year					
Fit for a church					
Connects to the church management software that you already use Ask which way the information goes					
The price stays the same as you add volunteers Get the price for the number of people that you'll have in two years					
Works on a phone in a hallway or on a ladder					
Your staff and volunteers finished their trial jobs without calling you					

What to check	Weight 1 to 3	Product 1	Product 2	Product 3	Notes
The company					
Help with setup, including bringing in your spreadsheets And whether it costs extra					
You can export all your data to a spreadsheet Try it at the end of the trial					
A monthly or short contract, and a free trial					
A person answers when something goes wrong Ask how fast					
A church about your size uses it and will talk to you					
Total: add up each score times its weight					

Scores: 0 = no, 1 = partly, 2 = yes. **Weights:** 1 = nice to have, 2 = important, 3 = must have. Score each product right after its trial, while it's fresh, and skip any line that you didn't get to test.

What stood out in each trial

Trying WiseHQ? Every WiseHQ plan includes unlimited users, so volunteers never cost extra, and the 14-day trial is free. Score us the same way that you score anyone else.
